

The chart displays wave height data over a 12-day period. The y-axis represents wave height in meters, ranging from 0 to 10. The x-axis shows dates from Saturday, February 22, to Tuesday, March 4. The data is categorized into five forecast accuracy levels, each represented by a different color: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), and Noise (red). Vertical dotted lines separate the days. A prominent red vertical line is drawn at the start of Monday, February 24, labeled 'LOW' at the bottom. The wave heights show a general downward trend from Saturday to Sunday, followed by a period of relatively stable heights between 2m and 4m from Monday to Friday. A significant increase in wave height is observed starting on Saturday, March 1, reaching a peak of nearly 6m on Tuesday, March 4.

Date	Forecast Accuracy	Wave Height (m)
Sat 22-Feb	Excellent	8.8
