

The chart displays wave heights in feet over a period from Tuesday, February 25, to Friday, March 7. The y-axis represents wave height from 0 to 15 feet. The x-axis shows dates. A vertical red line at Wednesday, February 26, marks the 'Now' position. Bars are color-coded by forecast accuracy: Green (Excellent), Purple (Very Good), Blue (Good), Yellow (Poor), and Red (Noise). A legend in the top right corner defines these categories. The chart shows a significant wave event on February 25-26, followed by a period of lower wave heights, and then a series of waves increasing in height from late February through early March.

Date	Wave Height (ft)	Forecast Accuracy
Tue 25-Feb	14.2	Excellent
