

The chart displays wave height data over a period of 12 days. The y-axis represents wave height in meters (m), ranging from 0 to 14. The x-axis shows dates from Tuesday, February 25, to Friday, March 7. The data is categorized into five forecast accuracy zones, each represented by a different color: Excellent (green), Very Good (purple), Good (blue), Noise (red), and Unknown (yellow). A red vertical line is drawn at the start of the 'new' period on February 27. The wave height generally decreases from February 25 to 27, then increases significantly, peaking around March 6, before decreasing again on March 7.
