

The chart displays wave height data over a period of 12 days. The first section (purple bars) shows historical data with peaks around 12m. A red dashed line at Feb 29 marks the start of the 'new' period. The second section (blue bars) represents the forecast, which shows a significant drop in wave height, mostly below 8m, with a peak around 13m on Mar 06. The forecast is categorized by accuracy: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), and Noise (red). The y-axis ranges from 0 to 14 meters. The x-axis shows dates from Thu 27-Feb to Sun 09-Mar.
