

The chart displays wave heights over a 15-day period. The y-axis represents wave height in feet, ranging from 0 to 8. The x-axis shows dates from Thursday, March 6th to Saturday, March 15th. A red vertical line is positioned at the start of Friday, March 7th, labeled 'Fri now'. The bars are colored green, indicating 'Excellent' forecast accuracy. The legend for 'Forecast Accuracy' includes: Excellent (green), Very Good (purple), Good (blue), Poor (orange), Noise (red), and Unknown (black).
