

The chart displays wave height data and forecast accuracy. The y-axis represents wave height in feet, ranging from 0 to 6. The x-axis shows dates from Tuesday, March 25, to Thursday, April 3. Purple bars represent observed wave heights. A blue line represents the forecast accuracy, which begins on Wednesday, March 26, marked by a red vertical line. The forecast accuracy is categorized into six levels: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The forecast accuracy starts as 'Good' and generally improves, reaching 'Excellent' by Thursday, April 3.

Date	Wave Height (ft)	Forecast Accuracy
