

The chart displays wave height data over a period of 11 days. The y-axis represents wave height in meters, ranging from 0 to 12. The x-axis shows dates from Monday, March 31, to Thursday, April 10. A vertical red line at the start of the data series (March 31) is labeled 'row'. The data is categorized into five forecast accuracy regions, indicated by different bar colors and vertical dashed lines: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), and Noise (red). The wave height starts at approximately 3.5m on March 31, peaks at about 10.5m on Saturday, April 5, and then generally decreases to around 1.5m by Thursday, April 10.

Date	Wave Height (m)	Forecast Accuracy
Mon 31-Mar	3.5	Noise
