

The chart displays wave heights in feet over a period of 11 days. The y-axis ranges from 0 to 5 feet. The x-axis shows dates from Sunday, April 13th to Wednesday, April 23rd. A vertical red line on April 14th is labeled 'row'. A legend titled 'Forecast Accuracy' is located in the top right corner, with color-coded categories: Excellent (green), Very Good (light green), Good (blue), Fair (yellow), Poor (orange), Noise (red), and Unknown (purple). The wave heights are represented by vertical bars. The data shows a peak in wave height on Saturday, April 19th, reaching nearly 5 feet, followed by a sharp decline on Sunday, April 20th, and then a gradual increase again towards the end of the period.

Date	Wave Height (ft)	Forecast Accuracy
