

The chart displays the daily number of new COVID-19 cases in the UK, categorized by forecast accuracy. The y-axis represents the number of new cases (0 to 6), and the x-axis shows the dates from Tuesday, April 15, to Thursday, May 1, 2020. The forecast accuracy is indicated by the color of the bars: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The chart shows a significant peak in cases around April 23rd, followed by a decline and then a resurgence in late April and early May.
