

The chart displays the forecast accuracy of the RW model. The y-axis represents the accuracy score from 0 to 7. The x-axis shows dates from 19-Apr to 05-May. The bars are color-coded according to the legend: red for 'Poor', green for 'Excellent', purple for 'Very Good', blue for 'Good', yellow for 'Fair', and grey for 'Unknown'. A vertical dashed line marks the start of the forecast period on 20-Apr. The accuracy starts high (around 6.5) on 19-Apr, drops to 'Poor' on 20-Apr, and then fluctuates between 'Excellent' and 'Good' for the remainder of the period.
