

The chart displays forecast accuracy over a period of 16 days. The accuracy is categorized into six levels: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (grey). A red vertical line indicates the current date ('Now') on April 21. The accuracy starts at a 'Noise' level on April 21, rises to 'Very Good' by April 22, and generally stays between 'Very Good' and 'Excellent' levels, with a significant dip to 'Good' and 'Poor' levels around April 29-30. It then rises again to 'Excellent' levels by May 5.

Date	Forecast Accuracy
