

The chart displays wave heights in feet over a period from April 25 to May 5. The y-axis ranges from 0 to 6 feet. The x-axis shows dates from Friday, April 25 to Monday, May 5. A vertical red line is positioned at the start of Sunday, April 27, labeled 'Low'. The bars are color-coded according to the forecast accuracy legend: Green for 'Excellent', Purple for 'Very Good', Blue for 'Good', Yellow for 'Poor', Red for 'Noise', and Grey for 'Unknown'. The wave heights show a peak around April 27-28, followed by a decline and then a sharp increase starting around April 30, peaking again on May 2.
