

Figure 10 consists of two vertically stacked bar charts sharing a common x-axis representing time from May 16 to June 1, 2017. The top chart shows wind speed in knots (0 to 20), and the bottom chart shows wave height in feet (0 to 5). Both charts include a forecast accuracy scale (Excellent, Very Good, Good, Poor, Noise, Unknown) and arrows indicating forecast direction. The wind speed chart shows a significant increase starting around May 21, peaking near 18 knots. The wave height chart shows a corresponding increase starting around May 21, peaking near 4 feet.
