

Forecast Accuracy

- Excellent: (Green)
- Very Good: (Purple)
- Good: (Blue)
- Poor: (Yellow)
- Noise: (Orange)
- Unknown: (Red)

The chart displays the forecast accuracy of the proposed model over time. The x-axis represents dates from 17-May to 02-Jun. The y-axis represents accuracy from 0 to 12. The chart is divided into segments by vertical dotted lines, each corresponding to a day of the week. The segments are color-coded: blue for 'Good', yellow for 'Poor', orange for 'Noise', and red for 'Unknown'. A legend on the right explains the color coding. The chart shows a general trend of decreasing accuracy over time, with a significant drop in accuracy starting around May 20th.
