

The chart displays wave height data from May 27 to June 6, 2023. The y-axis represents wave height in feet, ranging from 0 to 7. The x-axis shows dates from Tuesday, May 27, to Friday, June 6. A vertical red line at May 29 marks the 'Now' point. Bars to the left of this line are green (Observed), the bar at May 29 is red (Now), and bars to the right are purple (Forecast). The forecast bars are color-coded by accuracy: green for 'Excellent', blue for 'Very Good', dark blue for 'Good', yellow for 'Poor', red for 'Noise', and black for 'Unknown'. The forecast shows a significant increase in wave height starting around June 3, peaking at over 6 feet on June 4, before declining.
