

Figure 1 is a bar chart illustrating wind speed (m/s) over time, from Wednesday, June 4, to Friday, June 20, 2014. The y-axis represents wind speed in m/s, ranging from 0 to 25. The x-axis shows the dates. The chart is divided into color-coded regions representing different levels of forecast accuracy or data quality. A legend on the right side of the chart defines these categories: Excellent (green), Very Good (purple), Good (blue), Poor (brown), and Noise (red). The chart also includes a dashed line at the top right labeled 'Forecast Accuracy'.
