

The chart displays wave height in meters over a 14-day period. The y-axis represents wave height in meters, ranging from 0 to 14. The x-axis shows dates from Wednesday, June 11, to Saturday, June 21. A red vertical line marks the 'now' point on Wednesday, June 11. The chart is divided into three sections: historical data (green bars), a forecast period (blue bars), and a noise period (orange bars). The forecast period shows a general upward trend in wave height, peaking around 14 meters on Friday, June 20, before a slight drop on Saturday, June 21. The noise period shows a sharp drop in wave height to around 8 meters on Saturday, June 21.
