

The chart displays wave height data and forecast accuracy. The x-axis shows dates from Friday, 13-Jun to Monday, 23-Jun. The y-axis shows wave height in meters (0 to 12). Purple bars represent observed wave heights, and blue bars represent forecasted wave heights. A red vertical line marks the 'now' position on Saturday, 14-Jun. A legend on the right defines forecast accuracy levels: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (orange), and Unknown (black).
