

Forecast Accuracy

- Excellent (Green)
- Very Good (Purple)
- Good (Blue)
- Poor (Yellow)
- Noise (Red)
- Unknown (Grey)

The chart displays wave heights in feet over a period from Monday, June 16, to Thursday, June 26. The y-axis represents wave height from 0 to 6 feet. The x-axis shows dates. A red vertical line marks the start of the forecast period on Monday, June 18. The legend indicates that green bars represent 'Excellent' forecast accuracy, purple bars represent 'Very Good', blue bars represent 'Good', yellow bars represent 'Poor', red bars represent 'Noise', and grey bars represent 'Unknown'. The wave heights show a peak around June 19-20 and then generally decrease towards the end of the period.
