

The chart displays wave height data from Friday, June 27, to Monday, July 7. The y-axis represents wave height in feet, ranging from 0 to 4. The x-axis shows dates by day and month. A vertical red line at Saturday, June 28, marks the start of the forecast period. The legend indicates forecast accuracy levels: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The data shows a significant increase in wave height starting around Tuesday, July 1, peaking on Thursday, July 3, and then gradually decreasing towards the end of the period.
