

The graph displays the wave height in meters over a three-day period. The y-axis is labeled 'Wave height, m' and ranges from 0 to 1.6 with major ticks every 0.2 units. The x-axis shows dates from 06/30 to 07/03. The data series, labeled 'Buoy' in the legend, shows a relatively stable wave height of approximately 0.9 m on 06/30. On 07/01, the wave height increases significantly, reaching a peak of 1.6 m. On 07/02, the wave height fluctuates between 1.3 m and 1.6 m. On 07/03, the wave height drops back to approximately 0.9 m.
