

The chart displays wave height data over a 10-day period from July 8th to July 18th. The y-axis represents wave height in feet, ranging from 0 to 5. The x-axis shows the dates. A vertical red line at July 9th marks the 'Now' position. The bars are color-coded according to the forecast accuracy scale: Excellent (green), Very Good (light green), Good (blue), Poor (yellow), Noise (red), and Unknown (purple). The wave heights fluctuate, with a notable peak around July 12th reaching approximately 4.2 feet. The forecast accuracy transitions from Excellent to Unknown as the date progresses.

| Date | Wave Height (ft) | Forecast Accuracy |
|------------|------------------|-------------------|
