

The chart displays wave height data over a period of 11 days. The y-axis represents wave height in meters, ranging from 0 to 6. The x-axis shows dates from Saturday, 19-Jul to Tuesday, 29-Jul. A red vertical line at Sunday, 20-Jul, indicates the 'now' position. The legend indicates forecast accuracy levels: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The data shows a general trend of decreasing wave height from Saturday to Sunday, followed by a period of relatively stable wave height around 3-4 meters, and then a significant increase starting on Sunday, 27-Jul, reaching a peak of over 6 meters by Tuesday, 29-Jul.
