

The chart displays wave height data over an 11-day period. The y-axis represents wave height in meters, ranging from 0 to 2.5. The x-axis shows dates from Saturday, 02-Aug to Monday, 11-Aug. A red vertical line at Sunday, 03-Aug marks the 'now' point. The legend indicates forecast accuracy levels: Excellent (green), Very Good (purple), Good (blue), Poor (orange), Noise (red), and Unknown (black). The data shows a general trend of increasing wave height from Saturday to Sunday, followed by a period of relative stability and then a slight increase again towards the end of the period.
