

The chart displays wave height in meters on the y-axis (0 to 8) against time on the x-axis (12-Aug to 28-Aug). The forecast accuracy is categorized into five zones, each represented by a different color and separated by vertical dotted lines:

- Noise (Red):** 12-Aug
- Poor (Yellow):** 13-Aug
- Good (Blue):** 14-Aug to 15-Aug
- Very Good (Purple):** 16-Aug to 21-Aug
- Excellent (Green):** 22-Aug to 28-Aug

Wave heights generally increase from the 'Noise' zone through the 'Good' and 'Very Good' zones, peaking in the 'Excellent' zone. The 'Excellent' zone shows the highest wave heights, reaching up to 8 meters.
