

The chart displays wave height data over a period of 11 days. The y-axis represents wave height in meters, ranging from 0 to 1.5. The x-axis shows dates from Friday 15-Aug to Monday 25-Aug. The data is categorized into five forecast accuracy regions: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), and Noise (red). A vertical red line marks the start of the 'Noise' region on Saturday 17-Aug. The wave height generally increases from Friday 15-Aug to Saturday 17-Aug, then decreases on Sunday 18-Aug, and increases again on Monday 19-Aug. The 'Noise' region shows a significant increase in wave height, peaking around 1.4 meters on Saturday 23-Aug.
