

The chart displays the raw request rate (Y-axis, 0 to 7) over time (X-axis, from 06-Sep to 22-Sep). The bars are colored blue, indicating a 'Good' forecast accuracy. A red vertical line at the start of the timeline (06-Sep) is labeled 'now'. The forecast accuracy legend indicates: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The chart shows a significant peak in request rate around 14-Sep, reaching nearly 6 requests per second.
