

The chart displays wave height in meters on the y-axis (0 to 14) against time on the x-axis. The data is categorized by forecast accuracy, with a color gradient from green (Excellent) to yellow (Unknown). A red vertical line at Wednesday, September 25, indicates the 'LOW' tide. The wave height starts around 4.5m on Tuesday, September 23, drops to a minimum of about 3m on Wednesday, September 24, and then generally increases, peaking at approximately 13.5m on Thursday, October 2, before slightly decreasing on Friday, October 3.

Date	Day	Forecast Accuracy	Wave Height (m)
Tue 23-Sep	Tue	Excellent	4.5
Wed 24-Sep	Wed	Excellent	3.0
Thu 25-Sep	Thu	Excellent	3.0
Fri 26-Sep	Fri	Excellent	3.0
Sat 27-Sep	Sat	Very Good	3.0
Sun 28-Sep	Sun	Very Good	3.0
Mon 29-Sep	Mon	Very Good	3.0
Tue 30-Sep	Tue	Very Good	3.0
Wed 01-Oct	Wed	Good	3.0
Thu 02-Oct	Thu	Good	3.0
Fri 03-Oct	Fri	Good	3.0
