

Figure 10 consists of two vertically stacked bar charts sharing a common x-axis representing time from 28-Sep to 13-Oct. The top chart shows 'Wind Speed, kts' on the y-axis (0 to 25). The bottom chart shows 'Wave Height, ft' on the y-axis (0 to 7). Both charts use color-coded bars to represent forecast accuracy: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (grey). Arrows at the top and bottom indicate the direction of the wind and wave forecasts.
