

The graph displays the wave height recorded by a buoy over a four-day period. The vertical axis represents wave height in meters, ranging from 0 to 3.5 with major ticks every 0.5 units. The horizontal axis represents time, with labels for 09/30, 10/01, 10/02, and 10/03. The data is plotted as a single black line. The wave height starts at approximately 2.3 m on 09/30, fluctuates between 1.7 m and 2.7 m through 10/01, and then shows a significant upward trend starting on 10/02, reaching over 3.5 m by the end of the day.

Date	Approximate Wave Height (m)
09/30	2.3
10/01	2.2
10/02	2.0
10/03	3.5
