

The chart displays forecast accuracy over a 16-day period. The y-axis represents the count of forecasts, ranging from 0 to 12. The x-axis shows dates from 06-Oct to 21-Oct. The legend indicates six categories: Excellent (green), Very Good (purple), Good (blue), Poor (yellow), Noise (red), and Unknown (black). The data shows a high concentration of 'Excellent' forecasts in the first few days, followed by a peak in 'Very Good' forecasts around Oct 09-10. This is followed by a period of 'Good' and 'Poor' forecasts, and finally a period of 'Noise' forecasts from Oct 16 onwards.
