

Figure 10 is a bar chart titled "wave height, m" on the y-axis, which ranges from 0 to 12 in increments of 2. The x-axis shows dates from Saturday, 11-Oct to Tuesday, 21-Oct. The chart is divided into five forecast accuracy categories, indicated by different bar colors and a legend in the top right corner: Excellent (green), Very Good (blue), Good (yellow), Noise (red), and Unknown (grey). A vertical red line labeled "now" is positioned at the start of Sunday, 12-Oct. The bars show wave heights fluctuating between approximately 5m and 10.5m. The forecast accuracy transitions from Excellent to Very Good around 16-Oct, to Good around 18-Oct, and back to Excellent around 20-Oct.
