

The chart displays wave height data over a period of ten days. A red vertical line on Wednesday, October 15th, marks the 'pow' event. The 'Forecast Accuracy' legend indicates that the data is categorized as 'Excellent' (green) for most of the period, with some 'Very Good' (blue) and 'Good' (purple) segments. The wave heights generally range between 2.5 ft and 3.8 ft, with a notable dip around Saturday and Sunday.
