

Figure 10 is a bar chart titled "Wave height (m) over time". The y-axis is labeled "wave height, m" and ranges from 0 to 14 in increments of 2. The x-axis shows dates from Wednesday, 22-Oct to Friday, 31-Oct. A vertical red line at the start of Wednesday, 22-Oct, is labeled "now". The chart is divided into five forecast accuracy regions by vertical dotted lines: "Excellent" (green), "Very Good" (blue), "Good" (purple), "Poor" (orange), and "Unknown" (yellow). The bars represent wave height data. The wave height starts around 9.5m on Wednesday, drops to a minimum of about 7m on Thursday, rises to a peak of about 13.5m on Sunday, and then generally declines with some fluctuations, ending around 8.5m on Friday.
