

The chart displays wave height data over a period from October 25 to November 3, 2023. The y-axis represents wave height in meters, ranging from 0 to 14. The x-axis shows the dates. The data is categorized into four regions based on color: purple (leftmost), orange (middle-left), yellow (middle-right), and green (rightmost). A red dashed vertical line is positioned at the start of the purple region on October 25. A legend on the right indicates 'Forecast Accuracy' with five levels: Excellent (green), Very Good (blue), Good (purple), Fair (orange), and Noise (red). The wave heights show significant variability, with peaks reaching up to 14 meters in the purple region and generally lower values in the other regions.
