

The chart displays wave height in meters on the y-axis (0 to 14) against dates on the x-axis. The forecast accuracy regions are defined by vertical dashed lines: Noise (red, Oct 29), Poor (orange, Oct 30), Fair (green, Oct 31), Good (blue, Nov 01), and Excellent (yellow, Nov 06). The wave heights show a significant increase starting around Oct 30, peaking at approximately 12m on Nov 02 and 13m on Nov 06, before decreasing towards the end of the period.
