

The graph displays the wave height in meters over a four-day period. The y-axis is labeled 'Wave height, m' and ranges from 0 to 4.5 with major ticks every 0.5 units. The x-axis shows dates from 11/01 to 11/04. A legend in the bottom right corner identifies the data as 'Buoy'. The wave height begins at approximately 2.2 m on 11/01, shows minor fluctuations, and then rises sharply starting around 11/01 18:00. It reaches a peak of about 4.2 m on 11/02 at 06:00. Following this peak, the wave height remains high, fluctuating between 3.0 m and 3.8 m through 11/04.
