

The chart displays wave height data and a forecast. The y-axis represents wave height in feet, ranging from 0 to 10. The x-axis shows dates from Friday, November 14 to Monday, November 24. A thick red vertical line at November 14 indicates the start of the forecast period. The legend defines the forecast accuracy levels: Excellent (green), Very Good (blue), Good (purple), Poor (yellow), Noise (red), and Unknown (black). The bars are colored according to these levels: blue for 'Very Good' (Nov 15-18, 20-21), purple for 'Good' (Nov 19-22), yellow for 'Poor' (Nov 23), and red for 'Noise' (Nov 14). The wave height peaks at approximately 8 feet on November 20.
