

The chart displays wave height data and forecasts for November 17 to 26. The y-axis represents wave height in feet, ranging from 0 to 8. The x-axis shows dates from Monday, November 17, to Wednesday, November 26. A red vertical line marks the end of observed data on Nov 17. Bars are color-coded by forecast accuracy: Excellent (green), Very Good (blue), Good (purple), Poor (orange), Noise (red), and Unknown (yellow). Vertical dotted lines separate the days.
