

The chart displays wave height data over a 10-day period. The y-axis represents wave height in meters, ranging from 0 to 12. The x-axis shows dates from Saturday, December 13, to Tuesday, December 23. The data is categorized into five forecast accuracy regions: Excellent (green), Very Good (blue), Good (yellow), Noise (red), and Unknown (black). A red vertical line is positioned at the start of the 'Noise' region on Dec 13. The wave height generally peaks around Dec 14-15 and Dec 17-18, with a notable dip on Dec 13.

Date	Wave Height (m)	Forecast Accuracy
