

The graph displays wave height data over a five-day period. The y-axis, labeled 'Wave height, m', has major ticks at 0, 0.5, 1, 1.5, and 2. The x-axis shows dates from 12/11 to 12/15. A legend in the bottom right corner identifies the data source as 'Buoy'. The wave height starts around 1.5m on 12/11, fluctuates between 1.5m and 2.0m through 12/13, and then increases significantly on 12/14, peaking at approximately 2.5m before settling around 2.2m on 12/15.

Date	Wave Height (m)
12/11	1.5
12/12	1.8
12/13	1.9
12/14	2.5
12/15	2.2
