

The graph displays wave height data from a buoy. The y-axis is labeled 'Wave height, m' and ranges from 0 to 3.5 with major ticks every 0.5 units. The x-axis shows dates from 12/11 to 12/16. A legend in the top-left corner identifies the data series as 'Buoy'. The wave height starts around 0.7 m on 12/11, peaks at approximately 1.4 m, then drops to a low of about 0.3 m on 12/13. It remains relatively low until 12/14, when it begins to rise sharply, reaching a peak of over 3.0 m on 12/15 before fluctuating at high levels.
