

The graph displays the wave height recorded by a buoy over a six-day period. The vertical axis (y-axis) represents wave height in meters, ranging from 0 to 2.5 with major ticks every 0.5 units. The horizontal axis (x-axis) represents time, with labels for each day from 12/11 to 12/16. The data is represented by a single black line. The wave height starts around 1.5m on 12/11, fluctuates between 1.6m and 2.0m through 12/12, and then shows a general upward trend, peaking at approximately 2.5m on 12/15 before decreasing to around 2.2m by 12/16.

| Date  | Wave Height (m) |
|-------|-----------------|
| 12/11 | 1.5             |
| 12/12 | 1.8             |
| 12/13 | 1.9             |
| 12/14 | 2.2             |
| 12/15 | 2.5             |
| 12/16 | 2.2             |
