

The chart displays wave height (H) in meters on the y-axis (0 to 10) against time on the x-axis (Dec 19 to Dec 28). A red vertical line indicates the 'now' point on Dec 19. The bars are color-coded by forecast accuracy: green for 'Excellent', blue for 'Very Good', purple for 'Good', yellow for 'Poor', red for 'Noise', and black for 'Unknown'. The wave height shows a peak around Dec 20-21, followed by a period of relative stability around 7m, and then a slight increase towards the end of the period.
