

The chart displays wave height in meters (m) on the y-axis (0 to 14) against time on the x-axis (Dec 20 to Dec 30, 2023). A red vertical line at the start of Dec 20 indicates the 'Noise' period. The wave height peaks at approximately 13m on Dec 24 and then gradually decreases. The legend indicates forecast accuracy: Excellent (green), Very Good (blue), Good (purple), Poor (orange), Noise (red), and Unknown (black).
