

The chart displays wave height data and forecast accuracy. The y-axis represents wave height in meters (0 to 15). The x-axis shows dates from Wednesday, December 24, to Saturday, January 3. A red vertical line at December 25 marks the start of the hindcast period. The legend indicates that the forecast accuracy for the period from December 25 to January 2 is 'Excellent' (green bars), while the period from January 2 to January 3 is 'Very Good' (blue bars). The forecast accuracy for the period from December 24 to December 25 is 'Noise' (red line).
