

The chart displays wave height in meters on the y-axis (0 to 15) against time on the x-axis (Dec 26 to Jan 5). A red vertical line at Dec 26 marks the 'Low' threshold. The forecast accuracy is indicated by the color of the bars: green for 'Excellent', blue for 'Very Good', purple for 'Good', yellow for 'Poor', red for 'Noise', and grey for 'Unknown'. The wave height starts high (around 14m) on Dec 26, drops sharply to around 4m by Dec 27, and then fluctuates between 3m and 6m until Jan 2. From Jan 2 to Jan 5, the wave height increases significantly, peaking at around 10m on Jan 3, before decreasing again.
