

The chart displays wave heights in feet over an 11-day period. The y-axis ranges from 0 to 8 feet. The x-axis shows dates from Thursday, January 1st, to Sunday, January 11th. A vertical red line at Jan 02-Jan marks the 'Flow' point. The forecast accuracy is indicated by the color of the bars: Excellent (green), Very Good (blue), Good (purple), Poor (yellow), Noise (red), and Unknown (grey). The bars are grouped by day, with each day having multiple bars representing different measurements. The wave heights generally increase from Jan 01 to Jan 04, then decrease until Jan 07, followed by a significant increase starting on Jan 08, peaking around Jan 10-11.
