

The chart displays wind speed data and forecast accuracy over a period from January 17 to February 2. The y-axis represents Wind Speed in knots, ranging from 0 to 20. The x-axis shows dates from Saturday, 17-Jan to Monday, 02-Feb. A red dotted line at the start of Jan 18 indicates the beginning of the forecast period. The forecast accuracy is categorized into six levels: Excellent (green), Very Good (blue), Good (purple), Poor (yellow), Noise (red), and Unknown (black). The wind speed data is shown as a bar chart, with colors corresponding to the forecast accuracy for each day. The forecast accuracy starts as 'Noise' (red) on Jan 18, then transitions through 'Very Good' (blue), 'Good' (purple), and 'Poor' (yellow) as the forecast period progresses. The wind speed generally increases from Jan 18 to Jan 20, then fluctuates, with a significant peak around Jan 29-30, followed by a decline and a slight increase again towards the end of the period.
