

The chart displays wave height data and a forecast. The y-axis represents wave height in meters (0 to 12). The x-axis shows dates from Tuesday 20-Jan to Friday 30-Jan. A red vertical line at Tuesday 20-Jan indicates the start of the forecast. The legend defines the forecast accuracy levels: Excellent (green), Very Good (blue), Good (purple), Poor (yellow), Noise (red), and Unknown (black). The wave height is shown as blue bars until the forecast begins, then as purple bars. The forecast shows a significant increase in wave height starting on Wednesday 28-Jan, peaking at approximately 10m on Thursday 29-Jan, and then decreasing.
